EXPERIENCE

HUMANITAS AI
Product Designer | June 2019 - September 2019

Produced pixel-perfect features in Figma for a video mobile app aimed at empowering Arab youth in social issues

Worked directly with CEO to create graphics and organize info for pitch decks

Designed and coded the consumer-facing wesite for the app and relaunched Humanitas AI website on company server

SMARTGIVE
Front-end Developer | January 2018 - May 2018

Contributed to a blockchain-based application for charitible giving using React

Illustrated graphics and helped develop a skrollr animation to explain the process and encourage engagement from the general public

CLYMB HEALTH
UX Researcher | January 2018 - May 2018

Developed research plan to establish guidelines for redesign of current app to achieve client goals

Conducted heuristic evaluations, usability tests, and semi-structured interviews while recruiting Lyme patients for these methods

OPPO
R&D intern | May 2017 - July 2017

Developed and deployed surveys on several social media platforms to gain insight on photo editing behaviors in young adults as well as smartphone purchase factors

Conducted usability tests on photograhy apps to reveal potential features that should be incorporated into future Oppo smartphones
